

CS62D

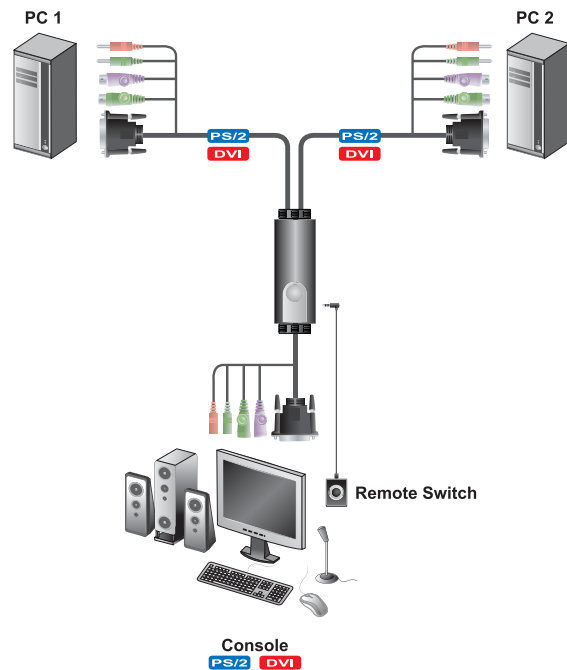

2-Port PS/2 DVI KVM Switch with Audio

The CS62D takes a giant step forward from prior models in the Petite series, by offering DVI functionality – allowing you to keep up with the latest innovations in computer video. The advantage of DVI is that it eliminates the problem of image distortion due to signal conversion found in analog video – resulting in a clearer, sharper, image.

Another new feature in the CS62D, is the implementation of a remote port selection switch – so that you can control port switching from the desktop while the switch, itself, can be placed in a convenient, out of the way, location.

Features

- One DVI video console controls two computers
- Fully DVI-Digital specification compliant
- Audio (microphone and speaker) enabled - 2.1 surround sound support
- Remote port selection switch for convenient switch placement
- Compact design
- Built in all-in-one cables (console 1.2m; computers 0.6m, 1.2m)
- Independent switching of the KVM and Audio focus – one computer can have the KVM focus while the other has the Audio focus
- Easy to install - no software required - connecting cables to the computers is all it takes
- Easy to operate - computer selection via pushbutton switch and Hotkeys
- Auto Scan function allows you to monitor both computers
- Hot pluggable - add or remove computers for maintenance without powering down the switch
- LED display for easy status monitoring
- Keyboard and mouse emulation for error free computer booting
- Supports Microsoft IntelliMouse and the scrolling wheel on most mice
- Caps Lock, Num Lock, and Scroll Lock states are saved and restored when switching
- Superior video quality - up to 1600 x 1200 @ 60Hz; DDC2B
- No external power supply necessary
- OS Compatibility includes Windows 2000 and higher; Linux; and Free BSD
