

Please following the steps given below to update the firmware version to v140508216701:

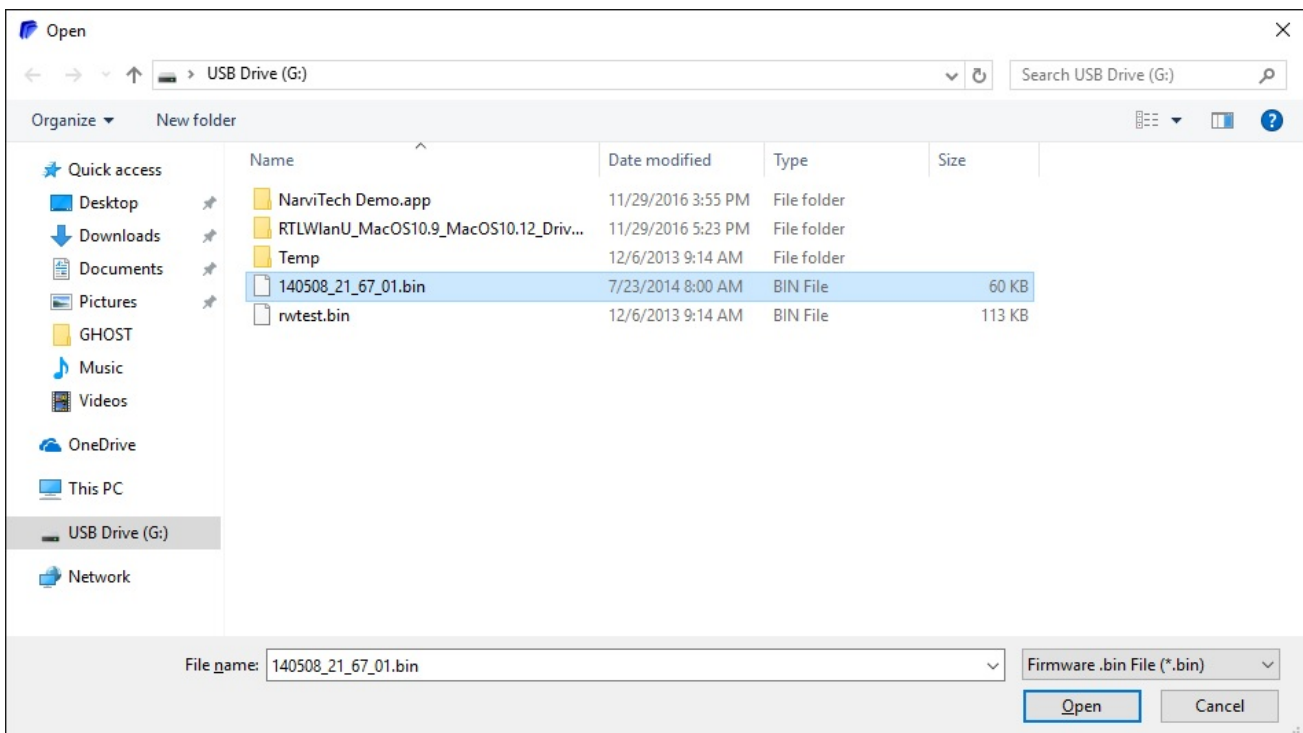

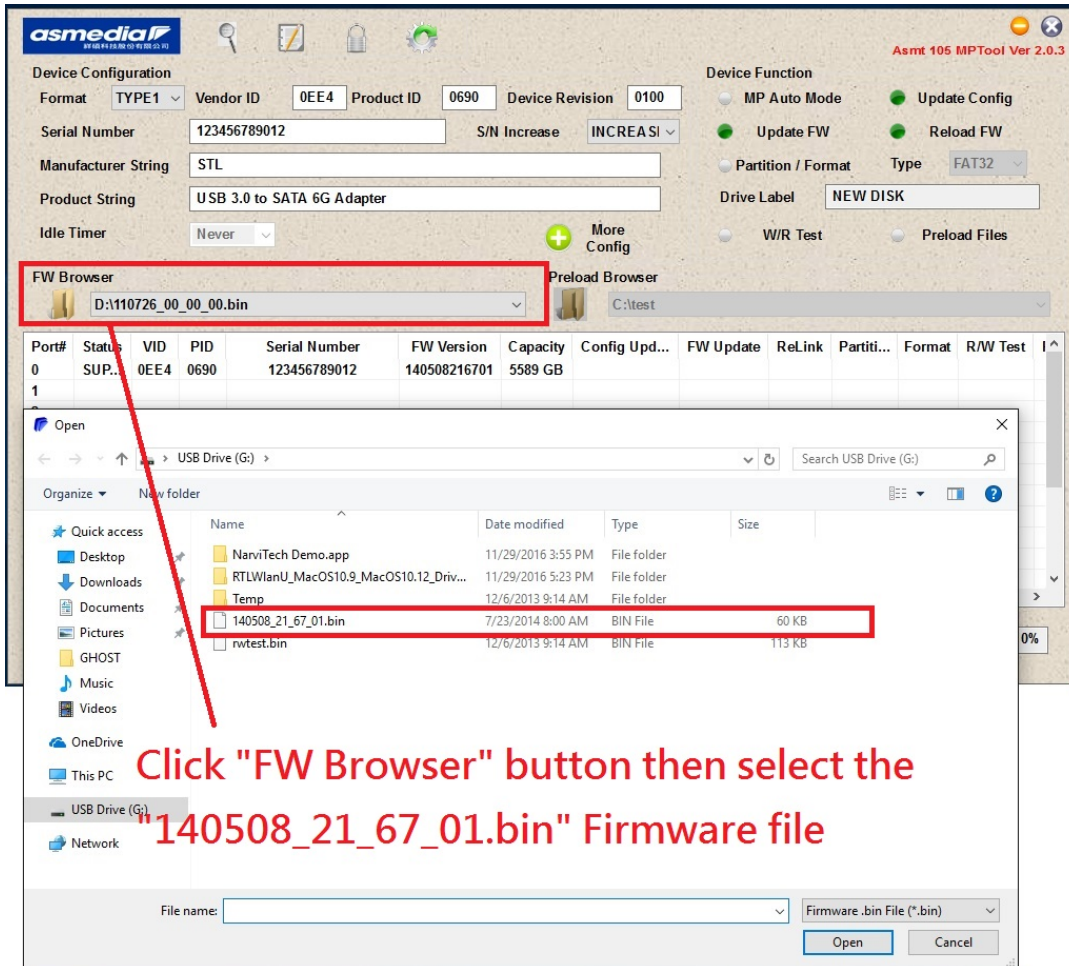

1. Download the firmware & OTB utility from web.
2. Extract the downloaded file to a certain folder.
3. Connect the AU0013 to a SATA HDD/SDD.
4. Locate to the "Firmware & MPTOOL" folder, and then launch the "MPTool.exe" program.
5. Then main menu window will pop up, click the 'unlock' icon.

6. Click on the "Unlock" button and type in "asmedia" for the password. This will unlock the program.

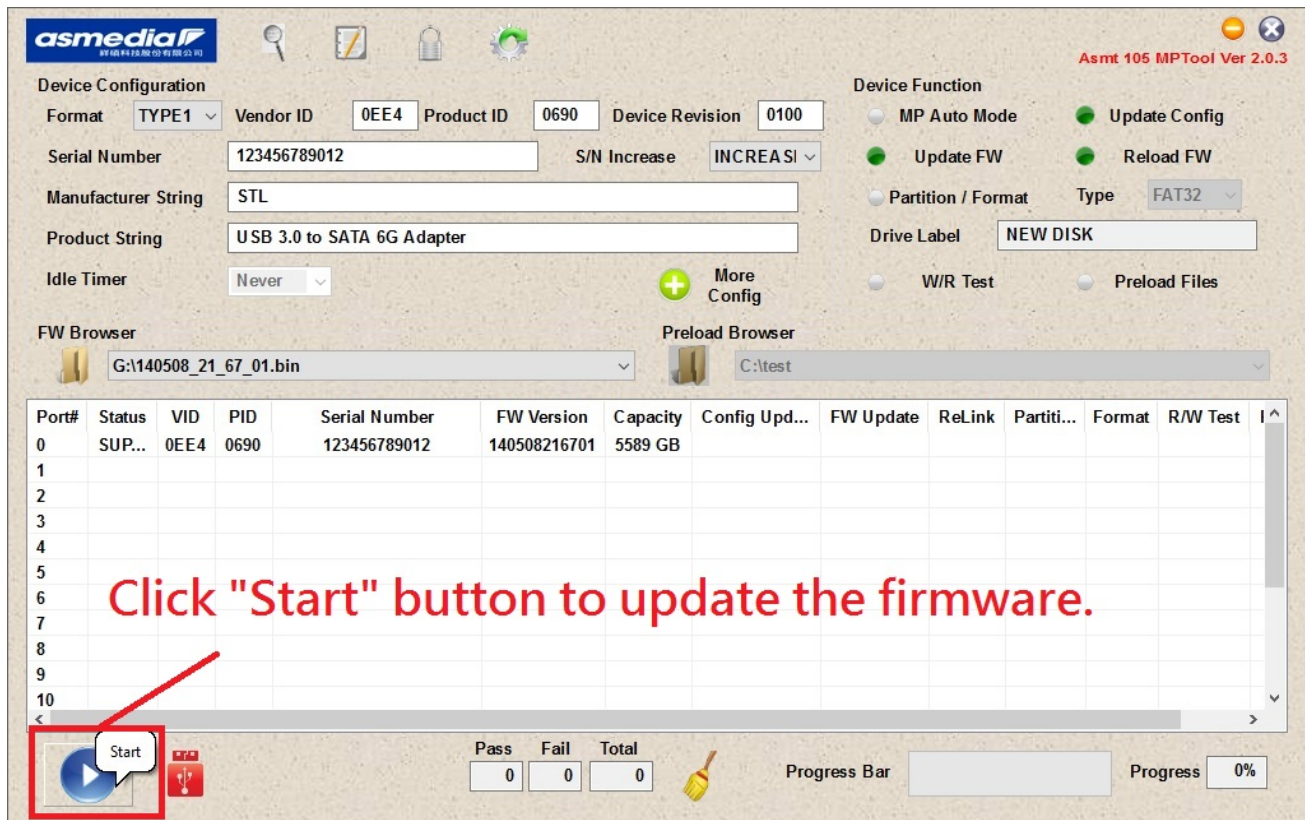

7. Select the "FW Browse" button and search for the firmware folder on your Desktop. Select the "140508\_21\_67\_01.bin" Firmware file.

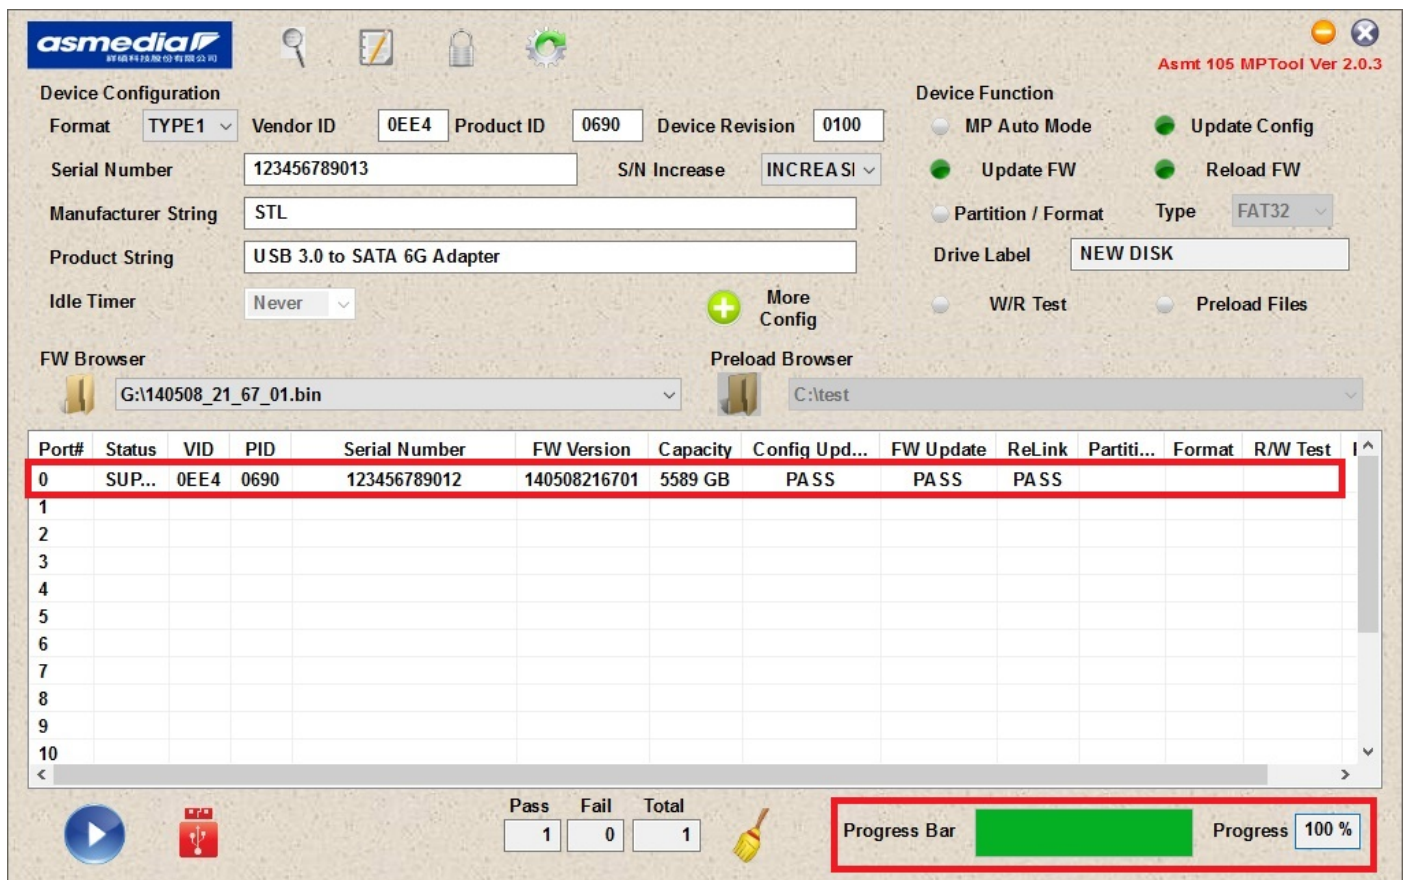

8. Click "Start" button to update the firmware.

9. Later, all three categories as shown below will show "PASS", and the Progress Bar on the bottom right will show 100%. Your firmware is now updated.

9. Unplug the AU0013 USB and turn off the power.
