M20 STREAMING KIT

USB Microphone Kit 96KHZ/24BIT Plug & Play USB Computer Cardioid Mic Podcast Condenser Microphone with Professional Sound Chipset for PC Karaoke, YouTube, Gaming Recording

PROFESSIONAL SOUND CHIPSET 96kHz/24bit: This Condenser Microphone has been designed with professional sound chipset, which let the USB microphone hold high resolution sampling rate.

PLUG and PLAY: The microphone has C type USB 2.0 data port which is easy to connect with your computer and Mac OS, and no need extra driver software, and no need for an external sound card. Double shielding USB cable reduces interference. That makes it easy to sound good on a podcast, livestream, video call, or most any other kind of recording.

16mm TRANSSOUND CONDENSER CAPSULE: With the 16mm capsule, the USB microphone can give you a strong bass response. This professional condenser microphone picks up crystal clear audio.

STURDY BOOM ARM SET: With a pop filter and a foam windscreen, the condenser mic records your voice and the sound is crystal clear, the shock mount holds the microphone steady with damping function. Particularly good for video voiceovers; podcasts; YouTube video; skype conferences.

RGB BACKLIGHT: M20 microphone come with 24 modes RGB led light.
